CYPRES Safety Rigging Notice 20110421

April 21, 2011

Background: In light of statements from other AAD Manufacturers we find it necessary to issue this Safety Rigging Notice.

Notification to all skydivers, parachute riggers, and rig manufacturers:

The CYPRES loop, loop material and disc system, (with or without silicon treatment) has been designed, developed and manufactured at Airtec GmbH & Co. KG in Germany, has been tested and approved ONLY in combination with the CYPRES AAD system.

It has not been tested by us with any other AAD on the market and therefore Airtec GmbH & Co. Kg can not take any responsibility if our products are used in conjunction with other AAD's.

(For liability reasons: the CYPRES loop and disc system is not to be used in combination with other AAD's)

For further information, see the CYPRES User's Guide, CYPRES Packer's Check-list, and CYPRES Rigger's Guide to Installation, which can be found at www.cypres.cc

Please feel free to contact Airtec or SSK any time there are any questions or concerns.

best regards,

Helmut Cloth
