

# ARES II

VISUAL ALTIMETER  
WATERPROOF

## SUPER-TOUGH DIGITAL VISUAL

The ARES II™ is the evolution of hardcore digital visual altimeters. ARES II™ takes full metal casing, durability, superior engineering, larger screen and accuracy to the skies.

With ARES II™, LB ALTIMETERS has created this new generation of altimeters featuring the following advancements:

## FEATURES & FUNCTIONS:

- Anodized aircraft grade aluminum case
- Scratch proof lens made from high-impact etched glass
- Shockproof and waterproof (5ft/24hrs)
- Accurate reading on High Contrast LCD Screen.
- Bigger display with larger, high contrast numbers
- Choice of readings in feet or meters
- Altitude offset
- Playback of altitude/speed profile for the last jump.
- 200 jump logbook
- Operational temperature range is -30° to +60° Celsius
- Strong yet light. Weighs only 70 grams
- H: 14.5mm L: 64.5mm W: 44.5mm
- Elastic band for mounting on wrist or arm
- Uses Renata CR 2325

ARES II™  
Dimensions:  
2-1/2" x 1-5/8" x 7/16"  
(63 x 42x 12mm)

# ALTITRACK VISO II+

**ANALOG DISPLAY WITH  
DIGITAL ACCURACY**

WATER RESISTANT

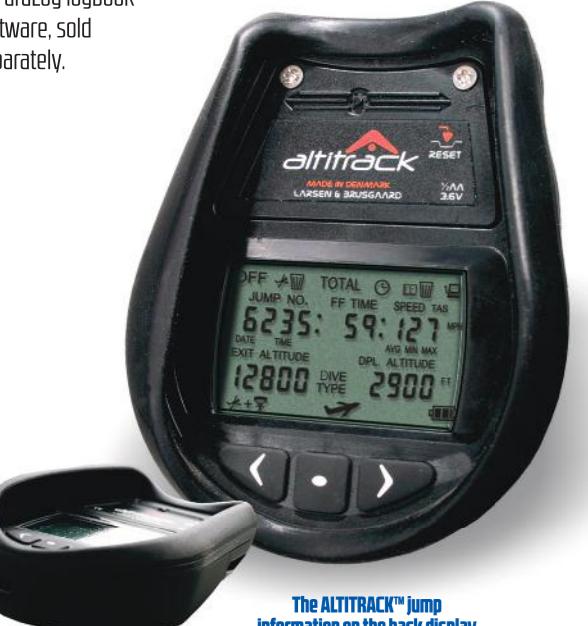

The ALTITRACK™ is sleek & small and shock & water resistant.

Actual Dimensions:  
3.18" x 2 3/4" x 3/4"  
(81 x 69 x 23 mm)

ALTITRACK™ is the only analog faced sport altimeter that utilizes the most high tech and durable digital components for accuracy. ALTITRACK™ surpasses every other mechanical sport altimeter currently available.

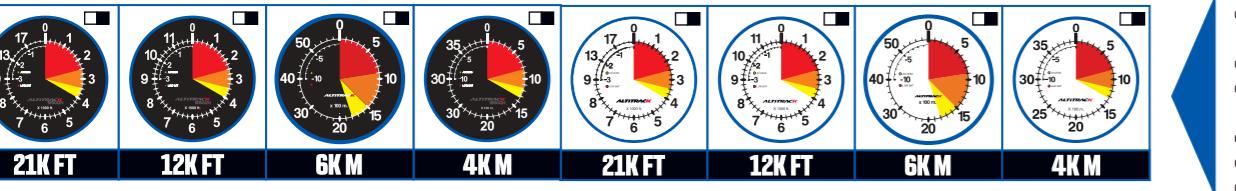

Record and view your jump information from exit to landing, ALTITRACK™ has the ability to download jump information to a computer, has an ergonomic fit, is both shock and water resistant.

Compatible with the latest version of ParaLog logbook software, sold separately.

The ALTITRACK™ jump information on the back display

**FACE/SCALE OPTIONS** ALTITRACK & STELLA FEET or METERS

ALTITRACK & STELLA: Black and white faces available in all scales & measurements.

## VISO II+ VISUAL ALTIMETER WATER RESISTANT

### DIGITAL SWOOP & SPEED

The VISO II+™ is a digital faced visual altimeter for those skydivers who prefer a digital display over a traditional analog display. VISO II+™ is packed with features and is the perfect visual solution for skydivers. VISO II+™ can be set to display ALTITUDE or VERTICAL SPEED.

A specially designed Sew-On Pocket can be put on the VISO II+™ to make it easier to attach to a glove, altimeter pillow or jumpsuit and is sold separately.

LB designed the VISO II+™ to be extremely easy to use and easy to read. The large number LCD screen is easy to recognize and read when the jumper is in freefall or under canopy. LB's attention to detail with the variety of accessories available allows jumpers to personalize and customize to fit their needs.

## STELLA VISUAL ALTIMETER WATER RESISTANT

### STEALTH HD HIGH DEFINITION BLACK

### ANALOG PERFORMANCE

STELLA™ the analog faced altimeter with a digital heart. STELLA™ was developed to be the sturdy, accurate, workhorse altimeter of sport skydiving. STELLA™ is the result of years of development, customer feedback and LB Altimeters' renowned engineering.

STELLA™ is customizable to your individual style with different sized STELLA™ Elastic Wrist Mounts in a wide variety of colors similar to VISO II+™ or a more familiar hand/fingerloop mount (included).

### FEATURES & FUNCTIONS:

- 45 deg. offset scale for easy line-of-sight viewing, when mounted on the hand/wrist
- 20 step adjustable electroluminescent backlight for night jumping
- Playback of last jump
- Smooth, non-erratic pointer movement.
- Step motor controlled
- Automatic calibration to local elevation
- Scratch proof, antiglare lens made from ultra clear, high-impact etched glass
- Shockproof and water resistant
- Long lasting 1/2 AA battery
- Operational at sub-zero temperatures

All LB Altimeters products are available at your favorite gear dealer.

### FEATURES & FUNCTIONS:

- High Contrast LCD Screen.
- Rugged rubberized coating.
- Electro-luminescent backlight for night jumping
- Can remain ON for several hours.
- Automatic calibration to local elevation
- LCD screen for easy & intuitive operation.
- Logbook with playback of altitude/speed profile for the last jump.
- Operational at sub-zero temperatures.
- Comes with hand mount.
- Stores up to 10 minutes of profile data for your last jump.
- Displays Alti-Meter or Speed-Meter details from exit to landing.
- Records and displays jump information about the last 200 jumps including exit altitude, deployment altitude, freefall time, max speed in freefall and max speed under canopy.
- Choice of readings in feet or meters as well as MPH or KMH.

VISO II+™ Elastic Wrist Mount in TONS of colors!

### MOUNTING OPTIONS

### FEATURES & FUNCTIONS:

- Durable rubberized coating
- Super-thin, ergonomic, comfortable curved design
- 3 selectable warning altitudes
- 1st and 2nd warnings: Different pulsating tones
- 3rd warning: High pitched siren
- Choice of 1, 2 or 3 warnings
- Easy and quick to set on the ground or in the aircraft
- Altitude selection interval: 500 Ft.
- On/Off mode
- Built-in mounting holes; fits most headgear
- Uses Renata CR 2325

- Uses the same CR2325 Batteries as VISO II+, Quattro™, Optima™, PROTRACK II™ and ARES II™
- Smaller, more efficient design. Mounts to almost any headgear without a clip.

## OPTIMA II™ ADVANCED AUDIBLE ALTIMETER WATER RESISTANT

### SWOOP & DIVE FANTASTIC

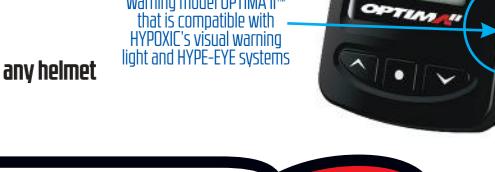

LB has listened to skydivers across the globe and has answered the call with OPTIMA II™. The OPTIMA II™ is a more advanced audible altimeter with accurate altitude detection and more features that make OPTIMA II™ the hands-down favorite audible around the world.

OPTIMA II™ is so accurate that it has an added set of warning beeps that can be set for a specific altitude during normal and high speed landing approaches. This feature has been added to aid both swoopers and conservative pilots alike find the "sweet spot" for initiating landing sequences. It's recommended that your eyesight and your experience be the primary source of determining at what altitude to start your landing sequence or pattern approaches.

### FEATURES & FUNCTIONS:

- Thin, ergonomic, comfortable curved design
- Durable rubberized coating
- LCD for easy- and intuitive operation
- 3 selectable warning altitudes
- 1st and 2nd warnings: Different pulsating tones
- 3rd warning: High pitched siren
- Choice of 1, 2 or 3 warnings
- Change warning alarm volume
- Four memory banks for custom warning settings
- Altitude selection interval: 10 Ft.
- Built-in clock
- On/Off mode
- Built-in mounting holes; fits any helmet
- Uses Renata CR 2325

## OPTIMA II™ ALTIMETERS

## QUATTRO ADVANCED AUDIBLE ALTIMETER WATER RESISTANT

### GO BIG!

QUATTRO™ sets the standard as being the most advanced audible altimeter available with more features, greater accuracy and the ability to finely tune your altitude awareness.

The QUATTRO™ audible altimeter is the latest in micro technology and features the most advanced programming for accurately measuring freefall & canopy descent rates. The QUATTRO™ allows the skydiver four sets of warning altitudes for high speed and three for low speed flight. This provides added interactivity in configuring frequently used warning alarms. The QUATTRO™ can also be set up to three climb warning alarms for the ultimate in precision altitude awareness.

The QUATTRO™ is fully automatic and continually reads ambient air pressure for real-time accuracy and attention to ground level. The QUATTRO™ is specifically designed for advanced skydiving disciplines: Bigways, Formation Skydiving, VFS, Freeflying, Wingsuit Flying, Student, Tandem, AFF, and also canopy related activities such as accuracy and CRW.

### FEATURES & FUNCTIONS:

- Allows settings up to 19990 Feet and can be used for Bigway formations, wingsuit flight setup and other precision skydives where four high-speed warnings are needed and desired.
- 0.5 second pulsating tones between the 1st and 2nd warnings help keep track of altitude separation of tracking groups or waves.
